PAS Designer User Guide

You are reading the user guide for **Scheer PAS** *Designer*.

It explains how to...

- ... structure your work within the Designer using the **Explorer**.
- ... configure Designer services in the **Service Panel** and how to use the Designer panels.
- ... model business processes using the **BPMN Editor**.
- ... design forms for your users to fill in during process execution using the **Form Editor**.
- ... make your BPMN model executable by adding executions in the **Execution Editor**.
- ... define data structures and mappings with the **Mapping Editor**.

You will also gain an insight into

- how to create and use connectors.
- how to work with libraries.
- how to configure the process instance list.
- how to create a role-based application.
- how to validate and test your services.
- how to deploy a service.
- how to execute Designer applications.

The Troubleshooting chapter helps you with resolving problems during modeling and executing services.

> ⓘ **Guidance for Designer Documentation**
>
> Creating and running services in Designer consists of several steps, all of which are explained in detail in the documentation:
>
> | Working Step in the Designer | Related Documentation |
> | --- | --- |
> | Service Development | Creating Connectors Modeling BPMN Modeling Forms Modeling APIs Implementing Your Process Working With Libraries Configuring the Instance List |
> | Service Validation and Testing | Validating and Testing a Service |
> | Service Deployment | Deploying a Service |
> | Service / Application Execution | Running Designer Applications |
