

# Working with the JavaScript Editor

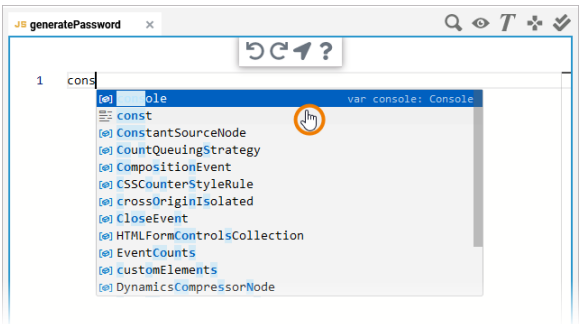

This page describes the basics of the integrated JavaScript editor.

To open the **JavaScript Editor**, click **Open model** in the quick action menu of the corresponding JavaScript operation.

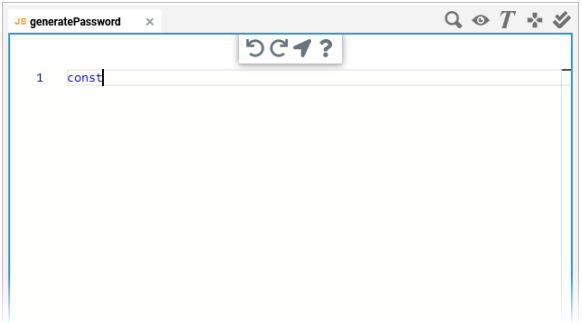

The editor will open in a new tab, and you can start entering your JavaScript.

To create a JavaScript statement, start by typing JavaScript syntax.

All available statements matching your input are listed.

You can also select one of the listed statements to use it.

The statement is transferred to the editor.

# The Toolbar

The JavaScript editor features a toolbar in the center top of the editor.

Icon	Description
	Undo the previous action you performed in... <ul style="list-style-type: none"><li>• ... one of the Designer editors (except mapping editor).</li><li>• ... the <b>Implementation</b> folder of the service panel.</li></ul> <div> If you click <b>Undo</b> in one of the Designer editors, this may also have an effect on the <b>Implementation</b> folder in the Service panel if you performed your previous action there.</div>
	Redo your previous action (after undo).
	Click on <b>Select in Service Panel</b> to jump to the related JavaScript operation in the service panel.
	Click on <b>Go to documentation</b> to open this JavaScript documentation.

# Highlighting in the JavaScript Editor

The highlighting of keywords supports you during your work in the editor:

Color	Content
Blue	<ul style="list-style-type: none"><li>• JavaScript Keywords</li></ul>
Red	<ul style="list-style-type: none"><li>• Syntax errors</li></ul>
Maroon	<ul style="list-style-type: none"><li>• Strings (single- and double-quoted)</li></ul>
Green	<ul style="list-style-type: none"><li>• Numbers</li><li>• Classes</li><li>• Comments</li></ul>
