

Bridge CLI

This Node.js module provides a command line interface to the Bridge, based on the [Bridge API](#). The Bridge CLI can be installed as a global utility and it can be used

- to **list**, **deploy**, **remove**, **start**, **stop**, view the **status** of xUML, Node.js and Java Services,
- to **view** and **change** the preferences of xUML, Node.js and Java Services,
- to download the service **repository** of xUML, Node.js and Java Services,
- for advanced xUML service handling like **killing** the service, viewing and changing the **service documentation**, or listing and cancelling **running sessions**
- to **pack** Node.js Services,
- **resource** handling in general (list, upload, delete),
- listing the **global variables**

You can install **e2e-bridge-cli** globally using:

```
npm install -g e2e-bridge-cli
```

You can find more a more detailed documentation of the package on the [GitHub](#) or [NPM](#) pages.
