

Database Configuration

Database Options

In the **Database configuration** section you will find the database options.

Here you can provide information on your company for the selected database.

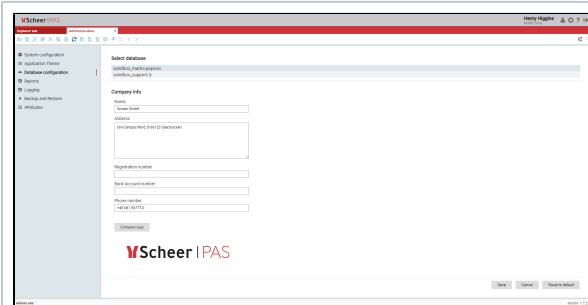

On this Page:

Selecting a Database

Choose the **Data base configuration** section in the menu on the left. On the right side of the window you are now able to select a database.

In our example, **sandbox_henry_higgins** has been selected.

Now you can change the settings of the selected database.

Company Information

VScheer IPAS

Select database

Select database:

Company info

Name

Email

Address

Registration number

Bank account number

Phone number

VAT ID

VScheer IPAS

Next Cancel Reset to default

Some of the fields in **Company info** are prefilled with information based on the user profile.

These options can be changed, and more fields can be filled for the first time, such as **Registration number** or **Bank account number**.

In this window you can also change the **Company logo** for the selected database.

VScheer IPAS

Select database

Select database:

Company info

Name

Email

Address

Registration number

Bank account number

Phone number

VAT ID

VScheer IPAS

Next Cancel Reset to default

To finish your database changes, click on the **Save** button.

You can reset the database information back to default (settings defined during registration) by clicking on the button **Reset to default**.
