

Fragments

Fragments panel location

The **Fragments panel** is by default located in the lower-right corner of the screen, along with the **Objects**, **Validation** and **Compare Model** panels.

This is where you can see and use fragments created by you or any other user.

Fragments panel overview

The **Fragments panel** gives you an option to **drag&drop** fragments that are currently available for the type of a model that you selected. They consist of one or more selected objects created as a fragment.

For more details on how to create a fragment visit the **Creating a new Fragment** section within the [Canvas](#) pages.
