	F u n c t i o n	The EPC element E-mail is a preconfigured worker, which enables the <b>server based dispatch</b> of e-mails. In contrast to the <i>mailto</i> command no mail program must be available on the user's end device for this. A double click on the element opens an editor, in which the e-mail text can be formatted and saved.

		<p>In the ACME Procurement process the Head of Accounting has to check the request, if the order exceeds the credit limit. As soon as a new subject to approval request is presented (the event <i>Credit limit exceeded</i> has occurred), the corresponding e-mail <i>Notification of approver</i> is sent to inform the approver that he has to act.</p> 	

## Configuration Options

Use the **Edit Sidebar** to make changes to the element.

Name E-mail		Name Name of the element within modeling.	
ID rp02727f33-b7cf-40ef-886e-b4da441295ff		ID (      ) The read-only field contains the model ID of the element. Designers can use the example in the <a href="#">search</a> to link the element in other models.	

<p><b>Description</b></p> <div></div>	<p><b>Description</b></p> <p>A commentary field for the modeler. Its content is invisible to users and internal documentation.</p>
<p><b>Hashtags</b></p> <div></div>	<p><b>Hashtags</b></p> <p>Possibility to insert your own key terms . The leading hashtag sign # (h inserted automatically.</p> <p>Use the spacebar to insert multiple hashtags:</p> <p><b>Hashtags</b> #Procurement #ACME</p> <p>One hashtag may be issued for multiple elements:</p> <div><div>Irene Adler ACME Corp.</div><div>#Procure</div><div>Drop-down Field: #Procurement <b>Department</b></div><div>Input Field: #Procurement <b>Name</b></div><div>Responsive Form: #Procurement #ACME <b>Procurement Request</b></div><div>EPC Model: #Procurement <b>ACME Procurement</b></div></div>
<p><b>Subject</b></p> <div></div>	<p><b>Subject</b></p> <p>Definition of the subject line to be displayed in the e-mail. Here you ma value or a placeholder (framed by #), which will be replaced by a value during dispatch.</p> <p>Example:</p> <div>Subject Order #OrderNumber# has been sent</div>

<p>Empty:</p> <p>Content Template </p> <p>Containing Content:</p> <p>Content Template </p>	<p><b>Content Template</b></p> <p>Click on the gear wheel to open a text editor ( BPaaS 17.3). Here you can edit the content for your e-mail. Placeholder (framed by #) will be replaced with the actual value during dispatch.</p> <p>The color of the gear wheel shows, whether an element is empty (light grey) or has already been saved (dark grey).</p> <p>Example:</p> 
<p><b>Date Format</b></p> <p>_____</p>	<p><b>Date Format</b></p> <p>If your content template contains a date from the instance, you can add it here. An overview of available placeholders and fill characters can be found <a href="#">here</a>.</p>
<p><input type="checkbox"/> Choose executing user as sender</p>	<p><b>Choose Executing User as Sender</b></p> <p>Activate this option if the current user shall be used as the sender of the generated mail.</p>
<p><b>Recipients</b></p> <div data-bbox="167 1003 721 1180"></div>	<p><b>Recipient</b></p> <p>The e-mail recipients need to be specified in a list. Multiple recipients can be entered; each entry has to be separated by comma or line break in the input field.</p> <p>Example:</p>  <p>Starting with BPaaS 17.3 it is also possible to send e-mails to a role in the system. All users owning this role will then receive the e-mail. Enter the role as a placeholder by #; the technical name of the role must be used) in the <b>Recipient</b> field.</p>
<p><b>Copy to</b></p> <div data-bbox="167 1512 721 1688"></div>	<p><b>Copy to</b></p> <p>Recipients to receive this mail in copy (CC) can be listed here. Multiple recipients can be entered; each entry has to be separated by comma or line breaks.</p> <p>Example:</p>  <p>Starting with BPaaS 17.3 it is also possible to send e-mails to the next role in the system. All users owning this role will then receive the mail. Enter the role as a placeholder by #; the technical name of the role must be used) in the <b>Copy to</b> field.</p>

<p><b>Attachments</b></p> <div></div>	<p><b>Attachments</b></p> <p>Use this field to define e-mail attachments. The files will be attached to dispatch. Use a placeholder (framed by #) or the notation <b>value;filename</b> attachment.</p> <div>  A modeler may use various options to define attachments for e further information and step-by-step instructions visit page <a href="#">Dis Attachments</a>. </div>
<p><input type="checkbox"/> <b>Mandatory</b></p>	<p><b>Mandatory</b></p> <p>Choosing this option makes executing the worker mandatory.</p>

## Developer Options

<div>Developer-Options </div>	<p>Open the <b>Developer Options</b> menu to use functions for advanced PAS design users.</p>
--	---

Oftentimes in projects the requirement exists to determine the recipient lists or e-mail content dynamically. The following elements are available to users with programming background (JavaScript):

The color of the gear wheel shows, whether an element is empty (light grey) or if content has already been saved (dark grey).

<p>Function: Determine Recipients </p>	<p><b>Function: Determine Recipients</b></p> <p>Click on the gear wheel to open the editor. Here you may save the code to identify the recipients, for example in a separate system.</p>
<p>Function: Determine Recipients for Copy to </p>	<p><b>Function: Determine Recipients for Copy to</b></p> <p>Click on the gear wheel to open the editor. Enter the coding to define the recipients in copy, for example to determine representatives.</p>
<p>Function: Determine E-mail Content </p>	<p><b>Function: Determine E-mail Content</b></p> <p>Click on the gear wheel to open the editor. Save your code to determine all e-mail content here.</p>

<b>Function: Determine attachments</b> 	<b>Function: Determine attachments</b>  Click on the gear wheel to open the editor. Enter your coding to identify e-mail attachments here.

## Date Format Specification

In two elements design users can specify the output of a date format:

- In the EPC element [E-Mail](#).
- In the form field [Date Picker](#).

The two elements do not use the same placeholders for the date format.

### EPC Element E-Mail

The following place holders may be used to specify the date format in the EPC element **E-Mail**:

Date Format	Place Holder	Display	Date Format Input	Display in Date Field (example date 01.02.2019)
Year	yy	two-digit year figure	dd.mm.y	01.02.19
	yyyy	four-digit year figure	dd.mm.yyyy	01.02.2019
Month	m	month digit without leading 0	d.m.yyyy	1.2.2019
	mm	month digit with leading 0	dd.mm.yyyy	01.02.2019
	mmm	month abbreviated	dd. mmm. yyyy	01. Feb. 2019
	mmmm	month written-out	d. mmmm yyyy	01. February 2019
Day	d	day digit without leading 0	d.mm.yyyy	1.02.2019
	dd	day digit with leading 0	dd. mmmm yyyy	01. February 2019
	ddd	week day abbreviated	ddd dd.mm.yyyy	Mon 01.02.2019
	dddd	week day written-out	dddd, dd. mmmm yyyy	Monday, 01. February 2019

### Form Field Date Picker

Date Format	Place Holder	Display	Date Format Input	Display in Date Field (example date 01.02.2019)
Year	yy	four-digit year figure	dd.mm.yy	01.02.2019
	yyyy		dd.mm.yyyy	01.02.2019
Month	m	month digit without leading 0	d.m.yy	1.1.2019
	mm	month digit with leading 0	dd.mm.yy	01.02.2019
	M	month abbreviated	dd. M. yyyy	01. Feb. 2019
	MM	month written-out	d. MM yyyy	1. February 2019
Day	d	day digit without leading 0	d.mm.yy	1.02.2019
	dd	day digit with leading 0	dd. MM yy	01. February 2019
	D	week day abbreviated	D dd.mm.yyyy	Mon 01.02.2019
	DD	week day written-out	DD, dd. MM yy	Monday, 31. February 2019

### Fill Characters

The place holders may be combined with a fill character, for example blank space, dot, comma, hyphen, horizontal line.

Date format placeholders may not be used as fill characters.

Fill Character	Date Format Input	Display in Form Field Date Picker (example date 31.01.2017)
dot	dd.mm.yyyy	31.01.2017
hyphen	dd-mm-yyyy	31-02-2017
horizontal line	yyyy/dd/mm	2017/31/01
blank space	d. MM yyyy	31. January 2017
comma	DD, d. MM yyyy	Tuesday, 31. January 2017
fill word	DD, the dd. MM yyyy	Tuesday, the 31. January 2017
