F u n c t i o n	The process navigation (breadcrumb navigation) shows the user which process step he is currently in and how he got there. The element is mostly used in a form's header. The name of the corresponding function from the EPC is displayed in the arrows.		
D e f a u l t	A newly created process navigation element contains the arrows Step 1 , Step with Form 1 , Step 2 , Step with Form 2 . During configuration of the element, you are also able to define that only steps with a form are displayed (see below).		
E x a m p l e	The example shows the process navigation in the ACME Customer Database app in which customer address data is managed. The input of data takes place in three steps: Entering personal data , Entering address details and Showing summary . The process navigation is configured to show only process steps with forms. The current process step is highlighted: In our example, the user is currently in step Showing summary .		

Configuration Options

The form element may be edited via the **Edit Sidebar**.

Name Process Navigation 	Name Field name shown in the form.
ID rp02727f33-b7cf-40ef-886e-b4da441295ff	ID () The read-only field contains the model ID of the element. Designers can use the ID for example in the search to link the element in other models.

<p>Description</p> <div></div>	<p>Description</p> <p>When a user hovers over a form element during execution, the content commentary field is shown as a quick info:</p> 
<p>Hashtags</p> <hr/>	<p>Hashtags</p> <p>Possibility to insert your own key terms . The leading hashtag sign # (h) will be inserted automatically.</p> <p>Use the space bar to separate multiple hashtags:</p> <p>Hashtags #Procurement #ACME</p> <hr/> <p>One hashtag may be issued for multiple elements:</p> 
<p>Additional CSS Classes</p> <hr/>	<p>Additional CSS Classes</p> <p>Enables a field-accurate layout customization.</p>
<p><input type="checkbox"/> Show Label</p>	<p>Show Label</p> <p>If this option is activated, the name of the element will appear in the top</p>
<p><input type="checkbox"/> Show Only Steps With Form</p>	<p>Show Only Steps with Form</p> <p>If this option is activated, the process navigation only displays process for which a form has been defined.</p>

Number of Shown Steps -1	Number of Shown Steps The process navigation shows the complete path a user has taken in the process, so this can lead to long paths. The option Number of Shown allows you to define a maximum number of steps the process navigation should display at the same time. The default value is -1 (all steps are displayed).
