

The Sidebar

Process mining enables the creation of individual evaluations based on your key process data. You decide yourself how you want the analyses to be shown: Choose the most suitable chart type for your analysis from a range of different options. You can also use the sidebar to analyse the differing variants that your process goes through and to create templates for analyses that are required on a frequent basis.

Your **Scheer PAS Process Mining** functionality is managed via the **sidebar**.

The sidebar consists of three areas:
