

The Templates Sidebar

In some cases it is helpful to re-use the basic data of an analysis or to configure a new analysis based on that data. For these use cases, you should create a [template](#).

Open the **Templates Sidebar** to create new templates and edit existing ones:

Scheer PAS Process Mining is delivered with four system templates:

Icon	Description
 Process Duration	Process Duration: Shows the average daily process duration in a line chart.
 Start Event	Start Event: Shows the daily distribution of the processes to start events in a bar chart.
 End Event	End Event: Shows the daily distribution of the processes to end events in a bar chart.
 State Duration	State duration: Shows the average daily function duration in a line chart.

The creation of new templates is supported by a wizard. Refer to chapter [Templates](#) for detailed explanations on the available options for templates. Use option **Create New Template** to open the template wizard (refer to [Creating a Template](#) for details).

Editing Template Properties

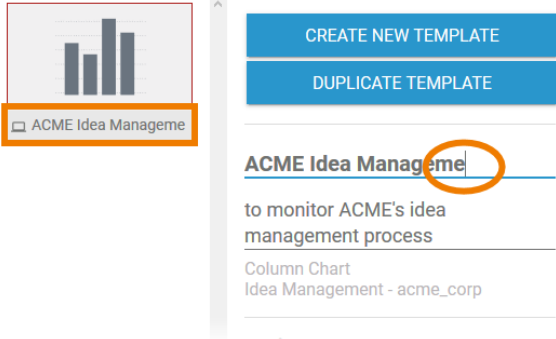

Select a template to display its basic data in the **Templates Sidebar**:

 Start Event	<p>You can recognize system templates by the  symbol.</p> <p>System template settings are displayed in the sidebar, but you cannot edit them.</p>
 ACME Idea Management	<p>You can recognize user-defined templates by the  symbol.</p> <p>You can edit the settings of user-defined templates in the sidebar.</p>

 Only an **administrator** can edit system templates and custom templates.

Naming the Template

	<p>Click in the box to edit the title of the template. Your changes are directly applied to the template tile.</p>
---	--

Description

	<p>In this field you can describe the template in more detail. Click in the description field in order to edit it.</p>

SAVE

CANCEL

Click in the filter area to open and edit a template's filter settings.

✔ Refer to [Configuring Filter Settings](#) for detailed information about filter settings.

Duplicating a Template

You can also use the sidebar to copy a template. Select the template you want to copy and use option **Duplicate Template**:

The **Create Template** wizard will open (refer to [Creating a Template](#) for details). You can change the template settings here or create an exact duplicate via option **Create New Template**. The copy is created and displayed in the user interface where you can edit its settings in the sidebar:
