

Installing the BRIDGE Installer

If you want to update an existing BRIDGE installation, please refer to [Updating a BRIDGE \(Installer\)](#).

For a complete installation, execute the following steps:

1. Install the BRIDGE program files.
There are two standard installation routines available:
 - Guided installation with a GUI (see [Guided Installation of the BRIDGE with GUI](#))
 - GUI-less installation (see [Gui-less Installation of the BRIDGE](#))
2. Check if the installation was successful (see [Checking the Installation](#)).
3. Install a licensing file (see [Installing a BRIDGE License Key](#)).
