Integration Support Request

(i)

Please note, that the quality of your report plays a significant role in reducing time that we need to fix the problem.

Installation Problems

ltem	Information
Problem with Brid ge Installation	If you have got a problem with installing Scheer PAS <i>Bridge</i> , refer to Troublesho oting the BRIDGE Installation in our online documentation.
	If this does not help, and you want to create a support ticket, please provide us with
	 the name of the Bridge installer file, e.g. BridgeInstaller-win32-64-7.1.0.jar the installation log file you can find at <user home="">\.e2ebuilder\console. install.log</user>
Problem with Buil der Installation	If you have got a problem with installing the Scheer PAS <i>Builder</i> , please provide us with
	 the name of the Builder plug-in file, e.g. BuilderPlugin18.0-7.2.0.x64.zip the Service Pack version of MagicDraw 18 you tried to install the Builder to
	If you have got problems installing MagicDraw, please refer to the Mag icDraw documentation and NoMagic support.
Problem with Anal yzer Installation	If you have got a problem with installing the Scheer PAS <i>Analyzer</i> , please provide us with
	 the name of the Analyzer installer file, e.g. AnalyzerInstaller-7.2.0.x64.exe the operating system you tried to install the Analyzer on On Windows systems: Open a Command Prompt and start the installer with AnalyzerInstaller-7.x.x.x64.exe >install.log. This will route all error messages of the installer to a separate log file. Attach this log file to your support request.

General Problem with Bridge Operating

If you have got Bridge operating problems like e.g. with creating users or groups, proxy management, uploading the firmware, etc. continue reading to find a list of information we need to work on your problem.

. If you have got service related problems, refer to xUML Service Problem further below.

xUML servic	If an xUML service crashes (it sign in the Bridge), we need the start log (see above) and the Bridge project including model, compiled repository and test cases.
crash	If you can not reproduce the error:
62	 If the Java adapter is used in the service, send file <bridge data="" directory="">\bridge_<name of="" service="" the="">\hs_err_pid<process_number>.log.</process_number></name></bridge> On Windows, enable full user-mode dumps in Windows Error Reporting and install the symbol xUML Runtime packages for the dump file to be created next time the service crashes. You can request the symbol packages from our support. On Unix, enable core dumps. You have got two possibilities to do this: Log in as Bridge user and manually start the xUML service using the command:
	 Enable core dumps on the BRIDGE by editing file <bridge directory="" prog="">/bin /e2e_console.sh.</bridge> Find the line
	echo ulimit -S -c 0 >> \$TOMCAT_SCRIPT
	add a #-sign in front of the line (to comment this line out) it and restart the BRIDGE.

Compile Problems With the Builder

If you have got problems with compiling a model with the Builder, find below a list of information we need to work on your request.

ltem	Information
Builder version	You can easily find the version number by going to the Builder > About menu.
	☑ Information About Scheer PAS BUILDER ×
	Information About Scheer PAS BUILDER Version 7.2.1, Thu Nov 22 08:42:55 CET 2018 Information about Scheer PAS BUILDER and installed modules.
	EZE Bridge Model Compiler Plugin
	Application Name E2E Base Application Version 7,2,1 Date 22,11,2018 Vendor Scheer E2E AG Copyright Copyright & 201-2018 Scheer E2E AG. All rights reserved. E2E XUML Runtime 2018.11
	This product includes software developed by the Apache Software Foundation (http://www.apache.org/).
	Copy to Clipboard
	There you can copy the whole version information by clicking Copy to Clipboard .
Excepti ons	If exceptions occurred, send the MagicDraw log file too:
	<user home="">\AppData\Local\.magicdraw\<version number="">\magicdraw. log</version></user>
Operati	Operating system the Builder is running on
ng System	
Builder project	If possible, zip the Builder project folder and send us the whole project this way or send us all involved UML files and all required resources. Don't forget the XMI files in the import- directory.
	If it is not possible to send the sources, send us the bxmi.wi file.
	To find this file:
	1. Go into the .\$work directory in your Bridge project.
	 Open the .xmi.id file and search for the UML file causing the issues. Copy the content of the id attribute (e.g. 950939989).
	3. In .\$work, open the directory having the same name as the id attribute found in the
	 4. Look for file <id attribute="">.bxmi.wi.</id>
	5. Zip this file and send it to our support.
